You can download Chanakya Niti In Oriya Pdf by Click The Download Button. Description: Chanakya Niti In Oriya Pdf Book is in PDF Format.

Q: Proving that $(n+1)! + (n+1) = (n+1)!$ I found this exercise on Catalan's Numbers but I'm having a hard time on it. Prove that $(n+1)! + (n+1) = (n+1)!$ where $n \in \mathbb{N}$. I've tried the following: Let $n = a + b$ where $a, b \in \mathbb{N}$.
$$(a+1)(a+1)! + (a+1) = (a+1)(a+1)! + (a+1 + b)$$
. This is exactly how it's meant to be, but I don't know how to prove it, because I don't know how to proceed on this step.

A:
$$\frac{(n+1)! + (n+1)}{(n+1)} = \frac{(n+1)!}{(n+1)} + 1 = \frac{(n+1)!}{(n+1)} + \frac{1}{n+1} = \dots$$
 using the obvious fact that
$$\frac{1}{n+1} = 1 - \frac{1}{n+1}$$
 Q: `std::vector::data()` and `std::vector::operator[]` for assignment I have a question about how to use an `std::vector` for simple assignment. The interface of the `data()` method seems to offer a way: `std::vector my_v = {1, 2, 3}; int i = my_v.data();` but the vector is always accessed in the same manner as `vector my_v = {1, 2, 3};`. Does this mean that copying the vector is done on the same basis as for: `int i = {1, 2, 3};` Does `std::vector` use the same way of checking for overload resolution for its `data()` and `operator[]`? A: Yes, this means that both `data()` and `operator[]` are convertible to `int` (and that you
